What is the Web-based Immunization Registry Database (WIZRD)?

WIZRD is a confidential, statewide computer system that provides secure access to immunization records for authorized healthcare professionals.

Is WIZRD safe?

The database is secure and confidential. Immunization records are safe — only authorized healthcare professionals with a password can access WIZRD.

What information is entered into WIZRD?

Information about your child and your child's immunizations are entered into WIZRD including, but not limited to:

- Full name
- Immunization record
- Date of birth
- Gender
- Address
- Phone number

Ask your health care provider or local health department for more information.

How can WIZRD help my family?

WIZRD stores immunization records electronically, all in one place. Even if you move to another town in Montana or see more than one health care provider, your child's immunization record will be available and up to date, ensuring continuity of care.

How do I get a copy of my child's immunization record?

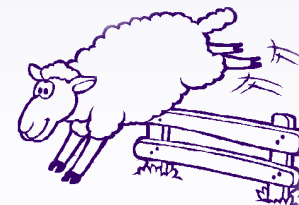

If you choose to participate in the registry, a copy of your child's current immunization record may be requested from your health care provider or the local health department.

Who can enroll in WIZRD?

Everyone. The service is free and completely voluntary.

How do I enroll my child in WIZRD?

Just ask your health care provider or local health department. Enrolling your child is quick and easy!

Count me in!!
